# Sally's Wizard IDEA gets better

**W**elcome to our latest magazine-style catalogue. We have lots of exciting news for you and, in

particular, how YOU are going to benefit directly from our latest business decisions.

Since we launched in 2009 we have developed the business on-line, through direct mail and through the trade via distributors and agents worldwide. That is all about to change!!

We have taken back direct control of our brands and now you will only be able to buy our Elite Wizard Jeans Collections through our new website or via mail order.

The benefit to our customers is enormous as it means that there will be

no more 'middle men' or retailers taking a large percentage of the cost of our Wizard Jeans®. This means that we can now pass on much lower prices to YOU across all our styles rather than paying it in sales and distribution. During the initial transition period there might be a few old styles available via Amazon or through some of our distributors overseas but in the future our brand will no longer be available to them.

So take a close look at all our new prices and you will see that our most expensive individually hand-finished party jeans range, which were £175 a pair, are now available to you at £135...a saving of £40 just on one pair...phenomenal value. Our entry level jeans now start at £75 and our mid-range are down from £125 to £99.

There are now over 50 styles of Elite Wizard Jeans and 2 very special new editions. For ladies, GIGI, a white, skinny cut jean in two leg lengths, individually hand-finished with a sprinkling of diamante stones which are perfect for Spring, Summer evenings or parties ..... or even that romantic beach wedding. For men we have the addition of HARRY, a very stylish straight cut white jean. Both styles benefit from our unique Wizard© body shaping technology so they ensure a svelte look.

Meanwhile, our highly successful and best-selling Sally Allen London, Chanel-style jackets continue to be much admired and

desired and are now available in 4 colours and 4 sizes. In addition, our Ruffle Polo neck very fine

knit sweaters are also a wardrobe 'must have' and now available in 12 colours and two sizes.

We still adhere to the Coco Chanel philosophy that **"a girl should be two things classy and fabulous"** but I would like to add men to the quote because personally I do think that all men can also look fantastic in a pair of well-cut jeans and a stylish shirt and jacket – not matter what age.

Talking of age, highlights another Chanel quote **"you can be gorgeous at thirty, charming at forty and irresistible for the rest of your life"** and again I think that this should be applied to the men too. With a little thought and being honest about our shape and how we can show off our best points – and yes – we do all have

some! - we can all create a timeless chic look of our own. Fashion should be our slave not us a slave to fashion, which is why it is best to be discerning about the pieces we choose and when trying on try to look at your image in a mirror from all angles – particularly the rear if possible! A view overlooked at your peril.

I firmly believe that you can wear anything you like at any age, it is just important to get the right shape to flatter your body and to drape the bits that you would rather keep your personal secret. I rely on Chanel again to sum-up **“fashion fades, only style remains the same.”**

I hope that you enjoy our new catalogue and make a few selections either for yourself or as gifts for others. Either way 'Happy Shopping'.

Best wishes,

Sally

# the *Shape* of things to come...

## 1 *Skinny*

A slim style that skims knees and ankles without being as tight in the leg as a jegging, the narrow shape of skinny jeans makes legs look long and lean. Great for lending your denim repertoire extra elegance.

*Style* **TIP:** Update your skinnies with boxfresh white trainers for a touch of sports-luxe style.

From Skinnies to Flares and everything in-between – there will be a style and shape to suit your figure. Our regular rise are cut a little wider at the top to help disguise ‘muffin tops’ and for extra security and confidence – the full rise straight or boot cut styles are an excellent option. Remember – your choice of shoes or boots can make a huge difference to your look.

## 2 *Straight Leg*

The straight-leg jean is back, teamed with everything from loafers to heels. This classic style is a flattering choice which balances the figure, creating an elongated silhouette – ideal if you’re petite.

*Style* **TIP:** Heels! They make your legs look even longer.

**3** *Flare*

Featuring a slim cut with a gentle flare, these jeans will not only flatter your figure but give the illusion of longer pins too. The gentle curved silhouette is a great foil for heels.

*Style TIP:* Create the high fashion look with high heels and a clean cut polo.

**4** *Boot Cut*

With a slim-fit upper leg, which flares out from the knee, bootleg jeans are universally flattering. A contemporary take on a vintage style, the shape adds interest to a simple T-shirt or go retro with a floral blouse.

*Style TIP:* For easy, retro-inspired style wear bootleg jeans with high heel boots and a bomber jacket.

# Measuring

Lay your best fitting jeans down on a flat surface and then measure the following:

## THE RISE

The measurement from the top of the waistband down to the bottom of the crotch seam.

If you are unsure of where your new jean will sit on your waist measure from the crotch upwards to the top of the waistband. This measurement will give you the correct measurement of where the jeans you are looking at will sit on your body. Remember, you may want to make a note of this measurement.

## THE INSEAM

The inseam is the measurement of the inside leg to take this measure from the crotch down the leg to the ankle.

## THE WAIST

Take the measurement from the smallest part of your waist which is your natural waistline, above your navel and below your ribcage. Measure straight across. Note that your actual waist measurement will not equal jean waist size. For example, a person with a 26-inch waist typically wears jeans with a 28-inch waist.

## THE HIP

Stand with your feet together take the tape measure around your bottom and measure the fullest part of your hips at the top of your legs, approx 9 inches lower than your waistline.

## THE LEG OPENING

This is the measurement that will tell you how wide the opening of the leg of your new jeans will be. Measure the circumference of the bottom of the hem.

Alteration  
service  
*LIO*

# Control

## POCKET CONTROL

The Wizard Jean styles with 'pocket control' all have special pockets made from high quality, strong fabric which are then stitched tightly either side of the leg inside the jean to maximise support to pull in and lift up the stomach.

## BONDING

All Wizard Jean styles with bonding benefit from special Wizard® body contouring technology. The 'Spanx' like fabric is bonded on to the denim and goes from the waist down to and including the very top of the thighs – which lifts the bottom, lifts and holds in the stomach and gives a very flattering contour to the hips. It works a bit like an old fashioned 'roll on girdle' – but you don't feel it because it is bonded on to the fabric and is extremely comfortable.

# Rise

Both women and men have a "unique rise measurement". The reason it's unique is because it's personal to our body shape and size. This is why finding the perfect pair of jeans tends to be tricky, trying to find a unique pair of jeans to fit our unique body seems like a one in a million shot. You wouldn't go hiking without a map would you, with this in mind your "unique rise measurement" is your map or key to finding great fitting jeans.

## MEASURING YOUR UNIQUE RISE

We all have a unique rise measurement and the key to successful shopping for jeans is knowing this magic number. (You will need to be wearing jeans for this bit.)

**a:** Take a tape measure and measure the distance from the crotch seam of your jeans upwards to your belly button. Write down this number as this is the highest rise you can wear comfortably for your unique body shape.

**b:** Then measure from the crotch seam up to two fingers below your belly button. This will give you the measurement of your most comfortable rise you should wear for your body shape.

**c:** The last measurement is for the lowest rise you can wear, so measure from the crotch seam up to three fingers below your belly button. By doing this you will have a clear idea of how high and low the rise of a jean needs to be for you to wear comfortably.

## FULL RISE STRAIGHT & BOOT CUT STYLES

Full Rise means that the jeans come up to and into the shape of the waist making the legs look elongated.

## REGULAR RISE SKINNY CUT STYLES

Regular rise means the jeans come up to the navel and have been cut a little straighter at the top to help disguise muffin tops.

N.B. Please note that all Wizard Jeans are cut and styled to give the best silhouette and that they will not lose their shape if they should need to be shortened.
